Atty. Doc. No. 2003P07076WOUS

Amendments To The Claims:

Please amend the claims as shown. Applicants reserve the right to pursue any cancelled claims at a later date.

1.-4. (canceled)

5. (new) An arrangement, comprising:

a panel pertaining to a flat screen, wherein the panel can be illuminated from the rear by the light of a back light;

a back light control for adjusting a luminance detected by a sensor to a pre-definable actual value, wherein

first light permeable parts are arranged between the back light and the sensor, and wherein

deterioration properties and/or temperature properties of the first light permeable parts essentially correspond to the properties of second light-permeable parts of the panel.

6. (new) The arrangement according to claim 5, wherein the first light-permeable parts comprise diffuser films and/or polarization films.

7. (new) The arrangement according to claim 6, wherein the first light-permeable parts further comprise a panel glass with LCD fluid.

8. (new) The arrangement according to claim 5, wherein the first light-permeable parts are essentially identical to the second light-permeable parts.

9. (new) The arrangement according to claim 8, wherein the first light-permeable parts are essentially identical to all second light-permeable parts.

10. (new) The arrangement according to claim 6, wherein the first light-permeable parts are essentially identical to the second light-permeable parts.

11. (new) The arrangement according to claim 7, wherein the first light-permeable parts are essentially identical to the second light-permeable parts.

12. (new) An arrangement comprising a panel pertaining to a flat screen, which can be illuminated from the rear by the light of a back light, comprising a back light control which adjusts a luminance detected by a sensor to a predefinable actual value, wherein first light permeable parts are arranged between the back light and the sensor, the ageing and/or temperature properties of which essentially correspond to those of the light-permeable parts of the panel.

13. (new) The arrangement according to claim 12, wherein the first light-permeable parts comprise at least diffuser and/or polarization films.

14. (new) The arrangement according to claim 13, wherein the first light-permeable parts further comprise a panel glass with LCD fluid.

15. (new) The arrangement according to claim 12, wherein the first light-permeable parts are essentially identical to all light-permeable parts of the panel.
